SUMMARY

Full Stack Software Engineer building scalable web applications, intelligent automations, and real-world digital products. I work across MERN, Next.js, Firebase, backend systems, and AI-powered automation — turning ideas into secure, high-performance solutions that solve problems and eliminate repetitive work.

FEATURED PROJECTS

Smart Escrow — E-Commerce Platform

MERN · Next.js · Stripe · Socket.io · Cloudinary · Stripe Connect

- Built a multi-vendor e-commerce platform with escrow-based transactions, secure payments, seller management, and real-time communication.

AI Automation Bots

Node.js · LLMs · MongoDB · Cloudflare Workers AI · Grok API

- Developed AI-powered LinkedIn and Binance Square bots for automated content generation, opportunity publishing, market analysis, and social media automation.

Reshine Cosmetics — E-Commerce Website

Next.js · Firebase · Bootstrap5 · Cloudinary · Firestore

Live: reshinecosmetics.top

- Developed and deployed a production e-commerce platform with responsive UI, dynamic product management, and Firebase-powered services.

GDC Gulabad — College Portal

React.js · Firebase · Bootstrap5 · Firestore

Live: gdc-portal.vercel.app

- Built a college portal featuring dynamic content management, real-time notifications, student services, and an administrative dashboard.

My-Accountant — Desktop Application

Electron · React · Node.js · MongoDB · Accounting

- Developed a desktop accounting system that automates transaction recording, financial management, and bookkeeping workflows.

LoyalVideos — Desktop Application

Electron · React · Node.js · Ffmpeg

- Built a desktop application that automates reaction-video creation by combining source videos with user-recorded reactions.
